

How to Import Logo and Background Pictures to KC601 Pro Switch

Please download converting tool here:

For Windows:

https://drive.google.com/file/d/1A26ZKJCAJf_8Ds6zocLiim06N8KGojGP/view?usp=sharing

Prepare:

Logo files: “.png” logo file, recommend 480x270px,

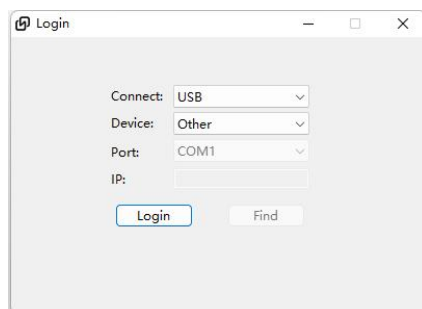

Background files: “.jpg” background file, 1920x1080P ,200-300KB

Save Path: The storage path for image files and convert tool cannot have special characters

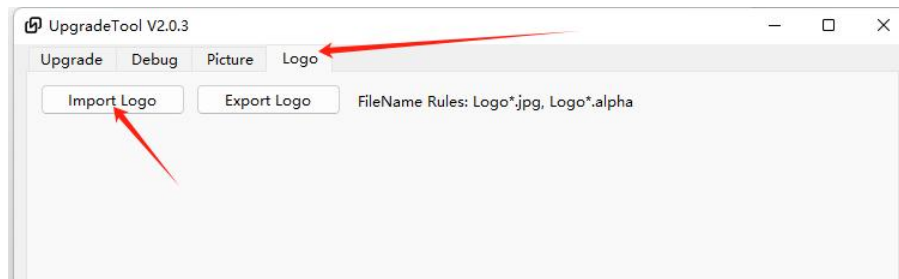

Covert Logo file and import logo to KC601 Switch

(1) unzip “KC601-Pro-tool”, and run “UpgradeTool.exe”

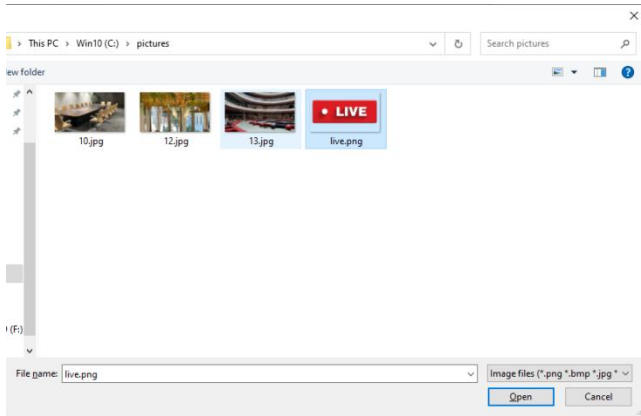

(2) login directly

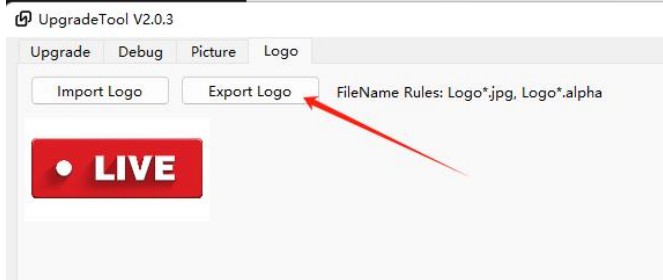

(3) Logo -> import Logo

(4) Choose prepared “.png” logo file

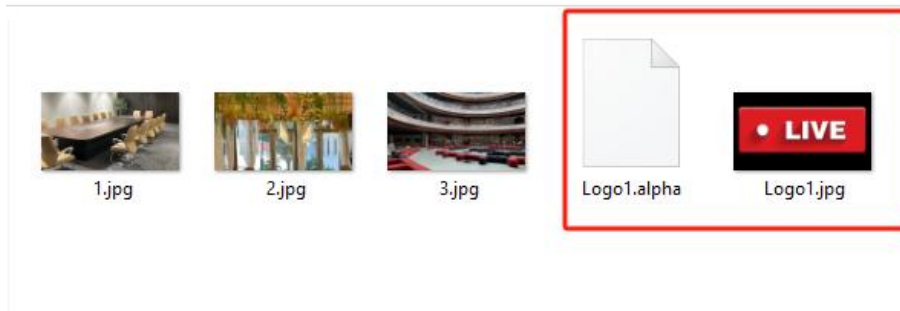

(5) Click Export Logo

(6) Two logo files will be saved to “ExportFiles” folder, which under the convert tool

| Name | Date modified | Type | Size |
|--------------------|---------------------|----------------------|----------|
| ExportFiles | 1/22/2024 5:25 PM | File folder | |
| generic | 12/23/2023 11:18 PM | File folder | |
| iconengines | 12/23/2023 11:18 PM | File folder | |
| imageformats | 12/23/2023 11:18 PM | File folder | |
| networkinformation | 12/23/2023 11:18 PM | File folder | |
| platforms | 12/23/2023 11:18 PM | File folder | |
| styles | 12/23/2023 11:18 PM | File folder | |
| tls | 12/23/2023 11:18 PM | File folder | |
| translations | 12/23/2023 11:18 PM | File folder | |
| Comm_Module.dll | 12/23/2023 5:18 PM | Application exten... | 111 KB |
| D3Dcompiler_47.dll | 3/11/2014 6:54 PM | Application exten... | 4,077 KB |

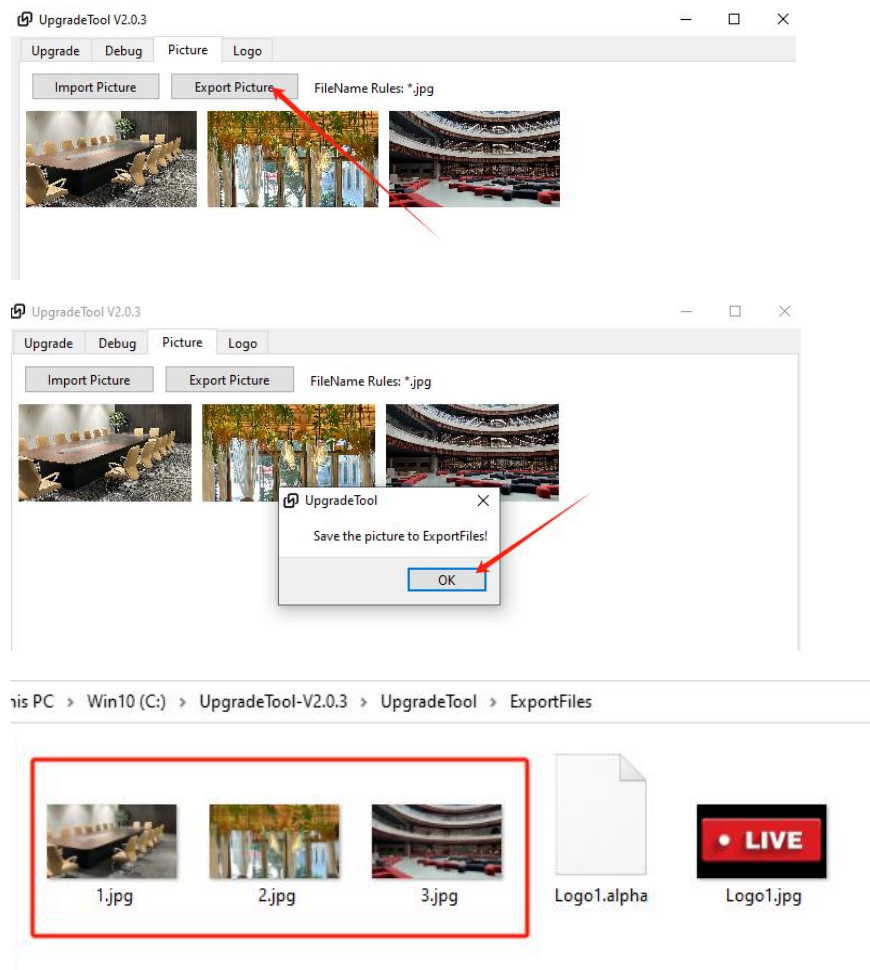

is PC > Win10 (C:) > UpgradeTool-V2.0.3 > UpgradeTool > ExportFiles

(7) **Convert background picture is the same as the logo converting.**

Go to picture-> import picture-> export picture

Then you will get converted background pictures in the “ExportFiles” folder too:

(8) You can change name for the logo and background pictures for easier remember.

Please note: KC601 Pro switch max can save up to 2 logo files and 16 background images

the name of logo files must be: logo1.jpg logo1.alpha, logo2.jpg, logo2.alpha

(9) Now, please use **USB-Type C cable** connect KC601 Pro switch to computer, computer will record the switch as an U disk.

(10) copy two logo files and the background files to KC601 pro switch U disk

(11) Unplug USB-Type C cable, power off and power on KC601 Pro switch, it will reload the logo and pictures, normally, it will take several minutes to load all the pictures.

Logo Size and Position Adjustment

Of course, you can adjust the logo's size.

For example, your logo is circular, maybe you created a 300x300px logo. When you uploaded the logo to KC601 pro switch, go to menu->picture setting->logo setting, then you can change the size and position of the logo.

If you meet any problem, please contact us at: ivan@fomako.net, normally, we will reply within 24hours.
